

Canada Conversion Loan Victory Bonds

After next Monday, local residents are reminded, it will no longer be possible to exchange old Victory Bonds for the new, higher rate Conversion Loan Bonds.

Bonds may be exchanged up till the close of business on September 10th. After that, the government offer expires. With well over 80 per cent of the new Conversion Loan now taken up, it is indicated that people of this community follow the example set by the war and invested heavily in these government securities. There may be a few, however, who have had reason or another have delayed converting and they should go to their bank or investment houses and take advantage of the "rights" which come with their Victory Bonds.

Some local people who held only one or two Victory Bonds and who would like a larger investment in Conversion issues are being advised that they may increase their savings by purchasing additional Victory Bonds and then converting them. This applies to those who have no "left over" Bonds and who would now like to become investors in Canada.

The nation-wide response to the Conversion Loan program has been most encouraging. Loan officials in Ottawa report. Particularly impressive has been the return from the smaller communities throughout the country where a large number of small units were held by individual citizens. Without the all-out support of these rural and small-town Canadians, the campaign could not have been a success.

Permit Book Dealine

As there are still a large number of producers who have not yet secured their 1938 65 delivery permit books, the Canadian Wildlife Service has extended the issuing deadline in the case of these rural and small-town Canadians, the campaign could not have been a success.

By the time the books close Monday Canada will have carried to a successful conclusion the largest financial transaction in its history. The public, by once again showing its faith in Canada has also, according to Dominion of Finance Minister Fleming.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Alberta Government Construction Program

The 1938 highway construction program is more than 177 miles of new grade have been completed, and more than 181 miles of stabilized gravel base course has been laid; more than 172 miles of asphaltic surfacing has been applied, and more than 132 miles of seal coat work has been completed. The same time less than sixty per cent of the work had been done.

As tangible evidence of the progress of the construction program, records show that 719 ships have been lost due to rain and inclement weather. The same time less than some 1,292 ships had been lost through various reasons.

World Cattle Numbers Continue To Increase

World cattle numbers continued to increase last year and reached a high of nearly 975,000,000 head on January 1, according to the Foreign Agricultural Service. The increase amounted to about 11,000,000 head over the year before and a 1,000,000-head gain over the 1935 average of 958,000,000 head.

Last year's gain in cattle numbers was the result of a 6,300,000 increase in the Soviet Union, an increase of 2,700,000 in Asia, 2,000,000 in South America, 1,000,000 in Western Europe, and 1,000,000 in Africa. Numbers in Oceania and North America declined slightly, with a slight decline in Asia.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Compared with their 1931-35 average, the cattle population increased by about 20,000,000 in Asia, 11,000,000 in Africa, 13,000,000 in South America, 3,000,000 in Western Europe, and 1,000,000 in Asia.

Market Situation

Rail embargoes to both Lakehead and Vancouver terminals have brought the grain movement in Western Canada to a virtual standstill. On the West Coast a strike of longshoremen has halted grain exports. At the Lakehead terminals are filled, and with a substantial number of cars on track or in transit, railroads have cut shipments from the prairie eastward to a trickle.

Harvest is underway across the prairies but with country elevators generally filled to capacity a great many farmers, particularly those in Alberta, are unable to make any deliveries under their initial quotas.

The strike at the West Coast is a matter of great concern, since it has cut off exports from that area. There is no indication as to how long the interruption may last, but even a short delay is serious since wheat is always in short supply in the hands of other exporters, sales may never be regained.

The export interest in wheat has been very high with limited sales being made, a situation which is liable to prevail over the next few weeks as heavy receipts of American spring wheat are now pressing on the market.

SHREINING MOMMAS

"Canadian mommas are getting smaller."

"An evergreen statement was made to me the other day by Montreal manufacturer who specializes in making, what the trade calls "momma dresses" the fashion advertisements enjoy flaunt them as styles for "the woman with the mature figure."

"Momma dresses" are especially designed and cut to clothe ample figures. Usually direct darts, flattered panels and carefully draped areas are combined with a soft drape to minimize the size of the wearer. Very few pretensions towards high style are ever attempted and all frills or furberies that might draw attention to the figure, are taboo.

My informant, who has been in the business of making "momma dresses" for 25 years, quoted startling figures to prove that his customers came from Leithbridge, Alta., to Lunenburg, N.S., have been shading pounds steadily for the past ten years.

Buyers used to come in here and order dozens of size 20s, dresses for their daughters, he explained. "Today the biggest order is size 18 1/2." He assured me that "this diet business was the cause for the change."

"You can't blame Canadian mommas," he said. "Everything they read today warns them that extra pounds could cause them to drop dead most times they run upstairs."

"I gathered others in the trade and found they readily endorsed his opinion when shown the picture of a Canadian momma counting calories."

"Momma dresses are on the way out," one manufacturer declared. "Today we make youthful designs and cut them to the large proportions but even the term 'momma' is becoming a dirty word."

Matrons are as pathetic to admit to wearing "matronly" dresses as building up a buyers resistence.

A group of momma dress manufacturers in the U.S. and Canada of Canadian women are the hard sellers of the industry and recently held a serious conference at which they attempted to invent a new term to describe the half-

Although Canadian women's changing sizes and dietary habits are changing, new products for them, they are not a bit sorry. Pride in the figure and fashion consciousness still run deep in them — demand for more products. They are all ready to buy a designer's admirer, more fashion-

Cats, cattle, mice and horses, as well as dogs, have been known to suffer from rabies.

Swimmer's itch prevalent

Numerous cases of popularity among swimmers with itch have been reported from various lake resorts in the Regina Rural Health Region, said Dr. M. C. Deland, Regional Medical Officer.

Swimmer's itch is caused by the larvae of a fluke which often penetrates the swimmer's skin, causing irritation. Water which supports small is liable to be source of contacting swimmer's itch. The itch begins shortly after swimming or wading in contaminated water. The worm dies in the skin in a few days.

Persons who have contacted swimmer's itch would expect a prickling sensation with itching spots on the skin. These spots usually disappear within a couple of hours. Ten to fifteen hours later, papules may occur accompanied by intense itching. In about a week the painful papules leaving small spots on the skin which may persist for several weeks.

Swimmer's itch, instead of causing discomfort and itching is not serious, said Dr. Deland. However, scratching induced by the itch may result in secondary skin infections.

Swimmer's itch can be prevented by thoroughly washing the body with clean water and drying with a towel immediately afterwards. If clean water is not available, rubbing the skin with a towel may be enough to prevent the itch. Rubbing the skin with alcohol can be used as an additional preventive measure. When the itch develops, soothing lotions usually bring some relief.

CARDIGAN SETS in wool come practically with the height of fashion. Wonderfully packable and warm, they are ideal for travel. Better climates and warm help on a similar ground mark this suit in all-round pleated skirt. Other details are dark, turned-back collar, the three-quarter sleeves, vertical pockets on each side of the front and the wide opening in which the skirt is sewn horizontally.

The best of habits

Good cheer is a great habit. It is all of life's machinery. Good cheer is a great product. It adds wonderfully to one's active ability and increases mental and physical power. It makes hosts of friends and helps us to be interesting and agreeable.

Good cheer will attract more customers, sell more goods and do more business with less wear and tear than almost any other quality.

Optimism is the greatest business-getter. Madrigal, trust achievement in the world.

In the business office, in society, in politics, in business, wherever, the favourite is always the cheerful person with the bright smile and pleasant thoughts.

Good-natured, cheerful ones do not waste their vital energies as rapidly as the grumpy or the too-serious, too sour ones do. They work with more efficiency than anyone.

Good cheer is a simple habit. It is one of the best in the list.

STILL WITH US

Our generation, with all reports, is still with us. If the children have no respect for the property of others, at least their parents should have. And they should have at least a vague idea of where the children are and what they are doing.

—Stanford Quigley (Journalist)

Helps You Overcome FALSE TEETH Looseness and Worry

Fascinating Flavor

Rich Tasted Flavor,
Interesting aroma and shiny golden crust make these twists irresistible accompaniment to dinners, salads and teas. If you make it, it's done, depends on Fleischmann's Active Dry Yeast for finest results!

SESAME SEEDS

Scald 1/4 cup milk.
Stir in 2 cups of flour.
1/4 cup granulated sugar.
1 teaspoon salt.
1/4 cup butter or margarine.
Cool to lukewarm.
Measure into large bowl.
1/4 cup lukewarm water.
Stir in 1/4 cup granulated sugar.
Sprinkle with contents of 1 envelope Fleischmann's Active Dry Yeast.
Let stand 10 minutes, then mix well.
Sift in lukewarm milk, mixture.
2 c. once-sifted all-purpose flour.
Beat until smooth and elastic.
Work in additional 1/4 c. about once-sifted all-purpose flour.
Knead into large ball, knead until elastic. Place in greased bowl. Grease top. Cover. Let rise in warm place for 1 hour.
Punch down. Roll out on floured surface. Cut into 12 equal pieces.
Roll each piece into a ball. Flatten slightly. Roll into a rope. Twist rope into a braid. Repeat with second portion. Grease top. Cover. Let rise until doubled in bulk about 1 1/2 hrs. Punch down. Roll out on floured surface. Cut into 12 equal pieces.
Roll each piece into a ball. Flatten slightly. Roll into a rope. Twist rope into a braid. Repeat with second portion. Grease top. Cover. Let rise until doubled in bulk about 1 1/2 hrs. Punch down. Roll out on floured surface. Cut into 12 equal pieces.
Roll each piece into a ball. Flatten slightly. Roll into a rope. Twist rope into a braid. Repeat with second portion. Grease top. Cover. Let rise until doubled in bulk about 1 1/2 hrs. Punch down. Roll out on floured surface. Cut into 12 equal pieces.
Roll each piece into a ball. Flatten slightly. Roll into a rope. Twist rope into a braid. Repeat with second portion. Grease top. Cover. Let rise until doubled in bulk about 1 1/2 hrs. Punch down. Roll out on floured surface. Cut into 12 equal pieces.
Roll each piece into a ball. Flatten slightly. Roll into a rope. Twist rope into a braid. Repeat with second portion. Grease top. Cover. Let rise until doubled in bulk about 1 1/2 hrs. Punch down. Roll out on floured surface. Cut into 12 equal pieces.

Power machinery . . . dangerous

Castling with the use of harvest, tractor and other power machinery on Saskatchewan farms this autumn will mean fewer fatalities than at Christmas, Hon. J. Walter Eby, minister of public health said.

Mr. Eby warned particularly against the use of tractor-pulled implements without the shields and guards which the manufacturers supply to protect operators. These shields should be firmly in place whenever the equipment is used, and if they do not, a few minutes spent on adjustment may prevent a lifetime of sorrow, or early death.

The minister said that a terrible woman had telephoned his department this summer to report the death of her 20-year-old nephew as a result of a power-shaft accident. The shaft had not been guarded and the boy's clothing caught in it, so that he was fatally mutilated.

"He was such a fine young man, so full of promise," the woman mourned.

"Nearly everyone is ignorant as to anyone else, and in the case of power, ignorance cannot be emphasized," the health minister commented.

"Every one has had a few people who are maimed for life, who will never be the same again, and a number have had to find other occupations, as their condition will not allow them to continue farm work."

Rabies outbreak

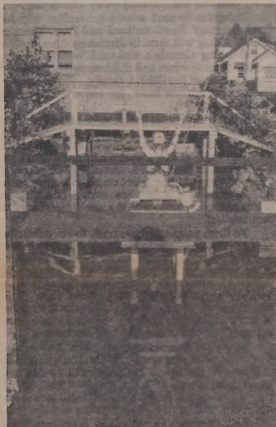

The recent outbreak of rabies in this district for several years has been reported by animal health officers.

Because of the immediate danger to humans as well as animals, all animal owners in the district should have their animals vaccinated against rabies immediately.

Only rabies, which is one of the most highly contagious diseases in regard to both humans and animals, has been controlled. It is easily proved fatal.

For their own protection and for the welfare of the community, persons having rabies should contact their local veterinarians for immediate diagnosis of the case. The Weekly Advance, Kempton, Ont.

(The Leader, St. James, Man.)

ROOFTOP GARDEN

Arlene Johnson, an eight-year-old girl, is the owner of this garden, the only hobby of Mr. and Mrs. J. Atsuy, represents the philosophy of making the best of what exists.

These owners of the Vincent Apartments, 1748 Portage avenue, behind which they have created a real beauty spot, believe that home should be as delightful as possible.

Asked where he found the idea for this garden, Mr. Atsuy replied that he thought of it himself. "We must be different," he claims, not always borrowing other ideas.

Pending over 30 by 60 feet of roof, the pool is filled to a depth of about one foot from the bottom, or by the concrete or mother Nature, as the weather dictates. Drainage is effected through pipes. Several wooden stands support geraniums, sunflowers and other annuals.

They were first introduced in the province a dozen years ago in North Battleford and are fairly thickly popular in southern Saskatchewan as a result.

The pheasant is a beautiful bird and there are several species of pheasants being taken care of by Balceres and the women here. One is a white variety, which has been developed in the hope that its color will give it added protection during winter months. It will also adapt the bird better to the Saskatchewan climate. White will definitely be an advantage for the pheasants who are often killed by predators such as owls, hawks, coyotes, etc.

Pheasants are a comparatively new game bird in Saskatchewan and are native of Asia and eastern Europe. They have been naturalized in various parts of the world. Pheasants like domestic fowls, are polygamous and nest in trees and feed on berries, seeds, herbs and worms.

Control of diabetes

Diabetes is growing in importance as a health problem because the number of diabetics in the population is increasing according to Dr. Lillian A. Chase in an article published in the Magazine of Health, the official publication of the Health League of Canada.

Three causative factors are clearly evident, says Dr. Chase. (1) more intensive search for and discovery of cases by better methods, (2) the aging of the population, (3) a diminishing caloric intake due to better treatment.

The incidence of diabetes is estimated at 1 percent of the population and may be greater. Taking the low figure, this means 12,000 diabetics in Metropolitan Toronto.

In 1950 diabetes was tenth in the cause of death with a rate of 10.4 for 100,000 population, causing 364 deaths in Ontario. The greatest number of these deaths occurred in the age group between 45 and 69 years, 104 or one-third were in this age group.

In 1950 the death rate per 100,000 population was 12.3 in Ontario. Therefore, the diabetic death rate in the province of Ontario was 7.22 times that of the average age at death, since the rate of insulin has risen from 44 to 64 years.

Public education for prevention, says Dr. Chase, is emphasized.

(1) as control of body weight—the fat person needs medical treatment.

(2) relative of diabetes should be periodically examined for this disease.

(3) inter-marriage of diabetics should be avoided—although this is difficult to control as 75 percent of diabetics develop the disease when they are over 50.

INDIANS FIRST FAIR

For many of 22 Indians and Metis who disembarked from a bus at St. James Park ground on a recent afternoon, the first exhibition was the first fair they had ever seen in their lives.

Members of a special leadership training course being conducted by the provincial government of Winnipeg, they came straight from the deep blue waters of Manitoba's northern lakes and rivers in the summer and fall and following their trip across the margins of their own lake in the winter and spring.

—Carleton (Winnipeg) News

Since then the loss of young pheasants has been limited and today there are approximately 135 healthy pheasants left.

This rare game bird is treated similar to young chickens or turkeys, requiring a brooder house with constant heat. Young pheasants are cannibalistic and it is necessary that they be kept in almost total darkness for the first five weeks. This will protect them from each other.

Chairman of Operation Pheasant is Dr. Cooper, who has contributed greatly to the development of the bird. He took over from the first five weeks. This will protect them from each other.

Conducting pheasant project

"Operation Pheasant" is the slogan being used by the Balceres Fish and Game League since they decided to introduce pheasants into the area last spring. A similar project last year failed completely.

The Balceres branch has become a very active organization and their membership has increased from 100 to 150 in 1950.

A year ago the introduction of the pheasant project was the first step in the project.

A new plan was adopted this year and it will result in a more successful project.

Man, cabinet gets shot in arm

Manitoba's health minister, Hon. George Johnson, resumed his role as physician last night when he injected a 10-year-old boy with Salk anti-polio vaccine.

The boy, who was 10 years old, was very healthy and beautiful. The parents were from the black-labeled and ring-necked pheasants.

The Balceres group of sportsmen are doing a fine job of raising and preservation of this fine game bird—the pheasant.

Johnson, who was 10 years old, was very healthy and beautiful. The parents were from the black-labeled and ring-necked pheasants.

Sunshine cruises

A program of five Sunshine Cruises to the West Indies and South America during the 1950-51 winter season has been scheduled for the Cunard cruise liner Mauretania, the Cunard Line announced recently.

The air-conditioned Mauretania will begin her Caribbean cruise program on Dec. 25 when she sails from New York on a 12-day Christmas and New Year's cruise which will take her passengers to St. Thomas, Martinique, Grenada, Curacao, Havana, minimum rate for this holiday cruise is \$365.

The 35,674-ton Mauretania will make four additional cruises to the West Indies during February, March and April, 1951, ranging in length from 12 to 18 days. The Mauretania's Sunshine Cruises will start on Feb. 7 with an 18-day voyage to Nassau, St. Thomas, Antigua, Martinique, Barbados, Trinidad, Curacao, Trinidad, Port-au-Prince and Havana. Minimum rate for this cruise is \$325.

This will be followed by another 18-day cruise sailing Feb. 27 to ten Caribbean ports. Rates for the Feb. 27 voyage start at \$325. The Mauretania will then sail from New York on Mar. 21 for 15 days and April 7 for 12 days on its last two voyages of the forthcoming cruise program to the West Indies.

The March 21 cruise will call at eight Caribbean ports while the April 7 voyage will call at five ports. Minimum rates for these cruises are \$415 and \$430 respectively.

CANADA'S U.S. TRADE PROSPECTS

Have been appreciably dimmed by the new U.S. Reciprocal Trade Agreements Act, terms of which mark a victory for the U.S. who would like to place further barriers in way of Canadian goods entering U.S. markets.

In first place, legislation in final form cuts terms of new Reciprocal Trade Agreements Act from five years to four. Worse still, it provides that Congress may override the President and rescind any reductions in U.S. tariffs which he may choose to make. Another victory for U.S. protectionists is found in authority given the President to raise tariffs by as much as 50 per cent. This new device for turning the Reciprocal Trade Agreements Act into an instrument to serve the interests of the protectionist bloc in Congress, found in the change in the base date for special tariffs that their *ad valorem* equivalent will henceforth be 1934 rather than 1945.

Hope for improvement in Canada's trade relations with the U.S. is effectively shattered when it is realized that every trade agreement which the Administration may make can be nullified by a vote of Congress. The uncertainty which Congress' overriding powers of veto in the new Reciprocal Trade Agreements Act introduces seriously blunts the incentive of Canadian producers to try to develop markets south of the border.

Local & District

Monday next, Sept. 15, is the close date for exchange of Victory Bonds for the new higher rate Conversion Loan Bonds.

Duck and goose hunting opened in the southern zone of Alberta on Sept. 8. We have yet to hear of any local accounts being out bagging any.

The weather continued dry and warm during the past week. At present writing, occasions are partly obscured with occasional bright sunshine and break winds. The temperature is in the 70's.

Export shipments of grain from Vancouver have still been held up owing to the longshoremen's strike for higher wages, and at this writing it is not an settlement is near at hand. In the meantime shipments of grain from Alberta to the West Coast are at a standstill.

Three local boys, Jim Trotter, Ray Remston, and Bill Muntak, are now working on the pipeline at Oyen. They were home for the weekend, and returned Sunday on their respective jobs. Jim Trotter, who hopes to secure work there.

Delta Community Hall

At a general meeting of the community centre citizens were present, and it was suggested by those present that the operation as well as the present building be turned over to the Delta Branch of the Canadian League. While the meeting was in favour of this, the Chinese have decided to vote in at the next meeting to be held on Wednesday, September 11th, 1958. Only other business transacted was the purchase of all Legion chairs for the hall at \$4.00 per unit.

The executive board that all citizens, business men, teachers, and town council represent in its attendance at the next meeting.

Canada's Old Age Security Fund, which paid \$40 million in 1957, has a projected deficit of \$20,000,000 at July 1st, 1958.

ON GRASSLAND it pays to

FAIR FERTILIZE WITH NITROGEN

for early spring pasture

ALL CROPS NEED NITROGEN Without nitrogen, your crop will starve. Your soil loses many pounds of this vital plant food every year! It can be replaced with a full-application of Elephant Brand HIGH NITROGEN Fertilizer.

NITROGEN for GRASSLAND To maintain or increase the fertility of your soil apply Elephant Brand HIGH NITROGEN Fertilizer this fall. Your grasslands will be ready for grazing weeks earlier... will feed more livestock... and re-grow faster. Livestock on fertilized grassland gain faster, are healthier, give more pounds of meat or milk.

Nothing to buy! In Prices—\$1.00! \$2.00 or more! See your Elephant Brand Agent for the Elephant Brand Nitrogen Content table.

\$2,000.00 IN CASH PRIZES!

Elephant Brand FERTILIZERS

Nitragrip (Ammonium Nitrate), 32.5% Nitrogen.
Ammonium Nitrate Phosphate, 27% Nitrogen—14% Phosphate.
Ammonium Sulphate, 21% Nitrogen.
Anhydrous Ammonia (NH₃), 82% Nitrogen.

T. O. Martin, Beyerbrook.
Wm. Gibson, Delta.

TAXES IN CANADA

Grumbling about high taxes

doesn't do much good unless

those who do the grumbling,

and that includes just about

everyone, know why taxes in

Canada are so high.

Reason for high taxes is re-

vealed by *Editor Forbes* in his

recent timely feature article

on cost of welfareism, state-

ing in *Canada Today*. Ac-

cording to Mr. Rude, in last

fiscal year the *King of the*
